DECLARATION OF CONFORMITY

Distributor Company name: CHIMSNAB TRADE LTD.

Name of company using trichloroethylene for metal cleaning: MIKROAK LTD.

Address of company using trichloroethylene for metal cleaning:
2, OBORISHTE STR., 2140 BOTEVGRAD,
SOFIA REGION, BULGARIA

I declare on behalf of *(name of company using trichloroethylene)* MIKROAK LTD.
that I will only use trichloroethylene for metal cleaning in sealed or enclosed open systems, as defined in Part A of European Standard EN 12921[1] (see definition below) – CHIMSNAB TRADE LTD beyond 31 December 2010.

[1] European Standard EN 12921-4 Machines for surface cleaning and pretreatment of industrial items using liquids or vapours - Part 4: Safety of machines using halogenated solvents.

3.7.1 TYPE I SEALED SYSTEM
A system in which there is no direct connection between any volume containing halogenated solvent and the outside environment during normal operation

NOTE: This declaration of conformity must be signed and returned to *(Distributor company name)* CHIMSNAB TRADE LTD by 31 December 2010 in order to continue purchasing trichloroethylene for metal cleaning from *(Distributor company name)* CHIMSNAB TRADE LTD beyond 31 December 2010.

[1] European Standard EN 12921-4 Machines for surface cleaning and pretreatment of industrial items using liquids or vapours - Part 4: Safety of machines using halogenated solvents.

3.7.1 TYPE I SEALED SYSTEM
A system in which there is no direct connection between any volume containing halogenated solvent and the outside environment during normal operation

3.7.1.1 TYPE Ia COLLECTION CHAMBER SYSTEM
A collection chamber system consists of a collection chamber and one or more process chambers with doors, one door sealing the collection chamber from the process chamber(s), the other from the outside environment

3.7.1.2 TYPE Ib SINGLE CHAMBER SYSTEM
A single chamber system consists of a chamber which is used for both processing items and collecting halogenated solvent vapours for recovery

3.7.2 TYPE II ENCLOSED OPEN SYSTEM
A system in which there is no connection between halogenated solvent and the outside environment during normal operation including loading and unloading. This cleaning machine consists of one or more open tank(s) within an enclosure. The items are processed through the cleaning machine by means of mechanical handling device and solvent fumes are collected at the inlet and outlet points of the enclosure.
