Administrative information

1.1. Trade names of the product

Fast Action Mouse Killer

1.2. Authorisation holder

Name and address of the authorisation holder	Name	Rentokil Initial Limited
	Address	Hazel House Millennium Park - Naas Ireland
Authorisation number	IE/BPA 70095	
R4BP 3 asset reference number	IE-0009208-0000	
Date of the authorisation	22/10/2014	
Expiry date of the authorisation	30/06/2026	

1.3. Manufacturer(s) of the biocidal products

Name of the manufacturer	Rentokil Initial Supplies
Address of the manufacturer	Webber Road Knowsley Industrial Park Kirkby Merseyside L33 7SR Liverpool United Kingdom
Location of manufacturing sites	Webber Road Knowsley Industrial Park Kirkby Merseyside L33 7SR Liverpool United Kingdom

1.4. Manufacturer(s) of the active substance(s)

Active substance	3 - alphachloralose
Name of the manufacturer	SBM Développement SAS
Address of the manufacturer	60 chemin des Mouilles 69130 Ecully France
Location of manufacturing sites	Excel Estate, S.V. Road Goregaon (West) 400062 Mumbai India

Active substance	3 - alphachloralose
Name of the manufacturer	LODI SAS
Address of the manufacturer	Parc D Activites Des 4 Routes 35390 Grand-Fougeray France
Location of manufacturing sites	LODI Group, site HIKAL Ltd., T-21. MIDC Industrial Area Taloja Raigad district 410208 Maharashtra India

2. Product composition and formulation

2.1. Qualitative and quantitative information on the composition of the biocidal product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
alphachloralose	(R)-1,2-O-(2,2,2-Trichloroethylidene)- α -D-glucofuranose	Active Substance	15879-93-3	240-016-7	4

2.2. Type of formulation

RB - Bait (ready for use)

3. Hazard and precautionary statements

Hazard statements	Very toxic to aquatic life with long lasting effects.
--------------------------	---

Precautionary statements

If medical advice is needed, have product container or label at hand.

Keep out of reach of children.

Read carefully and follow all instructions.

Do no eat, drink or smoke when using this product.

Avoid release to the environment.

Dispose of contents to in accordance with local requirements.

4. Authorised use(s)

4.1 Use description

Use 1 - Non-professional use indoors

Product type	PT14 - Rodenticides (Pest control)
Where relevant, an exact description of the authorised use	Fast Action Mouse Killer is a tamper resistant bait box containing 2 alphachloralose (4% w/w) bait blocks, for single use, to be used only indoors, by non-professionals, for the control of mice only.
Target organism(s) (including development stage)	<p>Scientific name: <i>Mus musculus domesticus</i> Common name: House mouse Development stage: Adults</p> <p>Scientific name: <i>Mus musculus domesticus</i> Common name: House mouse Development stage: Juveniles</p>
Field(s) of use	<p>Indoor</p> <p>Indoor use to control mice.</p>
Application method(s)	<p>Method: Bait application Detailed description: Place bait boxes containing 10g bait (2 x 5g) at intervals of 3 meters. The bait boxes can remain in place for a maximum of 7-10 days. After this time the bait boxes should be removed and disposed in accordance with local requirements. Once the mice population is controlled do not place further bait box down until a new infestation is identified.</p>
Application rate(s) and frequencies	<p>Application Rate: Place the bait stations containing 10g of bait (2 x 5g) at intervals of 3 meters Dilution (%): 0 Number and timing of application: The bait stations are placed for a period of 7-10 days.</p>
Category(ies) of users	

Pack sizes and packaging material

General public (non-professional)

Box, Polypropylene , 2 x 5g bait blocks

Outer cardboard box containing one to four tamper resistant bait boxes, made up of polypropylene. Each tamper resistant bait box will contain 2 x 5g bait blocks.

The blocks are placed in tamper-resistant bait boxes making them inaccessible to children and pets.

4.1.1 Use-specific instructions for use

Bait box is for single use only, ready and easy to use. Do not open bait box. Do not use in areas where food for human consumption or feed for livestock is prepared, consumed or stored. Simply place the bait box where mice have been seen. Ideal locations are against walls, under cupboards or behind furniture (where they cannot be tampered with). Bait boxes must be placed in areas inaccessible to children, companion animals and non-target animals. Where possible, secure bait box at its placement site so that it cannot be dragged away by mice and to minimise the risk of consumption and poisoning to children, companion animals and other non-target animals. When using more than one bait box, place them 3 metres apart. To maximise the bait take, ensure that alternative food sources have been removed wherever possible. Bait boxes should only be placed for a maximum of 7-10 days. Search for and remove dead mice daily during treatment operations to minimise the risk of consumption and poisoning to children, companion animals and other non-target animals. Dead mice should be double-bagged using plastic bags and either disposed of in a household waste bin with a secure lid to prevent access of wildlife or pets and collected in accordance with local requirements, as appropriate. Once the mice population is controlled do not place further bait box down until a new infestation is identified. In some unusual situations, if mice activity remains, it may be necessary to try another means of control. Remove all bait boxes after treatment and dispose of in accordance with local requirements. Bait boxes must not be reused or recycled. Wash hands after use of the product, and before eating, drinking or smoking. If swallowed, seek medical advice immediately and show the container or label.

4.1.2 Use-specific risk mitigation measures

Bait box is for single use only, ready and easy to use. Do not open bait box. Do not use in areas where food for human consumption or feed for livestock is prepared, consumed or stored. Simply place the bait box where mice have been seen. Ideal locations are against walls, under cupboards or behind furniture (where they cannot be tampered with). Bait boxes must be placed in areas inaccessible to children, companion animals and non-target animals. Where possible, secure bait box at its placement site so that it cannot be dragged away by mice and to minimise the risk of consumption and poisoning to children, companion animals and other non-target animals. When using more than one bait box, place them 3 metres apart. To maximise the bait take, ensure that alternative food sources have been removed wherever possible. Bait boxes should only be placed for a maximum of 7-10 days. Search for and remove dead mice daily during treatment operations to minimise the risk of consumption and poisoning to children, companion animals and other non-target animals. Dead mice should be double-bagged using plastic bags and either disposed of in a household waste bin with a secure lid to prevent access of wildlife or pets and collected in accordance with local requirements, as appropriate. Once the mice population is controlled do not place further bait box down until a new infestation is identified. In some unusual situations, if mice activity remains, it may be necessary to try another means of control. Remove all bait boxes after treatment and dispose of in accordance with local requirements. Bait boxes must not be reused or recycled. Wash hands after use of the product, and before eating, drinking or smoking. If swallowed, seek medical advice immediately and show the container or label.

4.1.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Likely direct or indirect adverse side effects and any directions for first aid: Ingestion of the product in large quantities may lead to nausea, vomiting, nervous system depression, headache and weakness leading to unconsciousness.
General Advice: In the event of accidental consumption the patient should be kept quiet and warm and a doctor called. Airways should be kept clear. Avoid sedatives. If cats or dogs are affected, similar first aid treatment should be employed.
For further information, contact the National Poisons Information Service (<http://www.npis.org/>). Retain the label for reference.
Advice for Doctors: Treatment is symptomatic and there is no specific antidote.

First Aid Advice: Inhalation: Unlikely route of exposure. However, remove patient to fresh air, keep warm and at rest. Apply supportive measures if necessary and seek medical attention. Eye contact: Rinse affected eye with clean running water, or eyewash solution for at least 15 minutes holding eyelids well apart. Rinse entire surface and do not allow run-off to contaminate unaffected eye. Seek medical attention. Skin contact: Remove and wash contaminated clothing immediately. Wash affected area thoroughly with soap and water. If the patient feels unwell, seek medical advice. Ingestion: Do NOT induce vomiting. If unconscious place in the recovery position and apply supportive measures if necessary. If conscious give patient up to ½ litre or 1 pint of water to drink. Seek medical advice immediately (show the label where possible). Avoid release to the environment. Keep away from drains, surface and ground water, and soil. DO NOT contaminate watercourses or ground.

4.1.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Remove all baits after treatment and dispose of them in accordance with local requirements. Baitboxes must not be reused or recycled. Waste bait should be double bagged in plastic bags and disposed of in a household waste bin with a secure lid to prevent access of wildlife or pets or taken to a civic amenity site. For information on civic amenity sites contact the local authority.

4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Keep only in the original container. Store in a cool, dry, well-ventilated place. Avoid extremes of temperature (e.g. below 0°C and above 40°C). Keep out of the reach of children and companion animals. Keep away from food, drink and animal feedingstuffs. Shelf-life: 2 years from manufacturing date under normal conditions of storage.
