

Justification for removing a substance from CoRAP prior to evaluation

Substance Name (public name): 1,1,1,3,5,5,5-heptamethyltrisiloxane

EC Number: 217-496-1

CAS Number: 1873-88-7

Authority: NO CA
PL CA

Date: 22/03/2022

The priority for evaluating the substance has been reconsidered based on:

<input type="checkbox"/>	The initial hazard ground of concern has been verified and considered of low priority

<input type="checkbox"/>	The initial exposure/risk ground of concern has been verified and considered of low priority
-	

<input checked="" type="checkbox"/>	The generation of information under Substance Evaluation is considered of low priority because
	<p><input checked="" type="checkbox"/> Already ongoing or implemented regulatory process(es)</p> <p>There is an on-going compliance check process (CCH) under which information relevant to clarify the initial concerns for PBT and reproductive toxicity was requested. It is expected that once obtained, the requested information could clarify the above-mentioned concerns. Furthermore, 1,1,3,5,5,5-heptamethyltrisiloxane (H-L3) is structurally closely related to octamethyltrisiloxane (L3, Cas no. 107-51-7). L3 has been concluded to meet the vPvB criteria following a recently finalized substance evaluation and data on this substance can be used in a read across approach for H-L3.</p> <p>In case the above mentioned concerns will not be (sufficiently) clarified by the information requested under CCH, the substance may be included in CoRAP again at the later stage.</p>
	<p><input type="checkbox"/> Registrants' (voluntary) action addresses concern</p> <p>Not applicable</p>
	<p><input type="checkbox"/> Other:</p>
