

Helsinki, 09 August 2023

**Addressee(s)**

Registrant of JS\_66669-53-2 as listed in Appendix 3 of this decision

**Date of submission of the dossier subject to this decision**

06 May 2022

**Registered substance subject to this decision ("the Substance")**Substance name: Tetrasodium hydrogen 2-phosphonatobutane-1,2,4-tricarboxylate  
EC/List number: 266-442-3**Decision number:** Please refer to the REACH-IT message which delivered this communication (in format TPE-D-XXXXXXXXXX-XX-XX/F)**DECISION ON TESTING PROPOSAL(S)**Under Article 40 of Regulation (EC) No 1907/2006 (REACH), you must submit the information listed below by **18 August 2025**.

Requested information must be generated using the Substance unless otherwise specified.

**Information required from all the Registrants subject to Annex IX of REACH**

1. Long-term toxicity testing on fish (Annex IX, Section 9.1.6.; test method: EU C.47./OECD TG 210)

The reasons for the decision(s) are explained in Appendix 1.

**Information required depends on your tonnage band**

You must provide the information listed above for all REACH Annexes applicable to you in accordance with Articles 10(a) and 12(1) of REACH. The addressee(s) of the decision and their corresponding information requirements based on registered tonnage band are listed in Appendix 3.

You are only required to share the costs of information that you must submit to fulfil your information requirements.

**How to comply with your information requirements**To comply with your information requirements, you must submit the information requested by this decision in an updated registration dossier by the deadline indicated above. You must also **update the chemical safety report**, where relevant, including any changes to classification and labelling, based on the newly generated information.

You must follow the general requirements for testing and reporting new tests under REACH, see Appendix 4.

**Appeal**

This decision, when adopted under Article 51 of REACH, may be appealed to the Board of Appeal of ECHA within three months of its notification to you. Please refer to <http://echa.europa.eu/regulations/appeals> for further information.

**Failure to comply**

If you do not comply with the information required by this decision by the deadline indicated above, ECHA will notify the enforcement authorities of your Member State.

Authorised<sup>1</sup> under the authority of Mike Rasenberg, Director of Hazard Assessment

Appendix 1: Reasons for the decision

Appendix 2: Procedure

Appendix 3: Addressees of the decision and their individual information requirements

Appendix 4: Conducting and reporting new tests under REACH

---

<sup>1</sup> As this is an electronic document, it is not physically signed. This communication has been approved according to ECHA's internal decision-approval process.

## **Appendix 1: Reasons for the decision**

### **Contents**

|  |          |
|--|----------|
| <b>Appendix 1: Reasons for the decision.....</b>   | <b>3</b> |
| <b>Reasons for the decision(s) related to the information under Annex IX of REACH .....</b>            | <b>4</b> |
| 1. Long-term toxicity testing on fish .....  | 4        |
| <b>References .....</b>  | <b>6</b> |
| <b>Appendix 2: Procedure .....</b>   | <b>7</b> |
| <b>Appendix 3: Addressee(s) of this decision and their corresponding information requirements.....</b> | <b>8</b> |
| <b>Appendix 4: Conducting and reporting new tests for REACH purposes.....</b>                          | <b>9</b> |

**Reasons for the decision(s) related to the information under Annex IX of REACH****1. Long-term toxicity testing on fish**

1 Long-term toxicity testing on fish is an information requirement under Annex IX to REACH (Section 9.1.6.).

*1.1. Information provided to fulfil the information requirement*

2 You have submitted a testing proposal for a Fish, Early-Life Stage Toxicity Test (test method: OECD TG 210).

3 In your justification for the testing proposal, you indicated that: *"A testing proposal for Annex IX Long Term Fish is included in the dossier based on BoA decisions A-010-2018 and A-011-2018. The BoA in A-011/2018 came to the conclusion that registrants are required to propose long-term fish testing under Annex IX in any case, and that registrants may be required to perform / shall propose (under column 2) longer term fish toxicity tests that go beyond those described in Annex IX, column 1. According to the BoA, Annex IX (section 9.1, column 2) does not allow registrants to omit information on long term toxicity to fish under column 1. Rather, according to the BoA, Annex IX requires registrants to submit information on a further study than one of the three listed in Column 1 of Section 9.1.6. of Annex IX, if the chemical safety assessment indicates that it is necessary to investigate the effects of a substance on aquatic organisms beyond what any one of those three Column 1 studies would do."*

4 However, you further consider that the evaluation of the testing proposal should be suspended until the decision of the General Court on case T-656/20, which challenges the Board of Appeal decision A-010-2018.

5 You further refer to animal welfare reasons by referring to Para. 132 of C-471/18 P stating that: *"It follows from those general provisions, which are to be construed in the light of recital 47 of the REACH Regulation, according to which it is necessary to replace, reduce or refine testing on vertebrate animals', that a registrant has, generally and therefore especially where ECHA issues it with a decision asking it to complete its registration dossier with a study involving animal testing, not simply the possibility but the obligation to generate information obtained by means other than animal testing 'whenever possible' and to undertake such testing 'only as a last resort'".*

6 ECHA notes that acts and decisions of EU Institutions and agencies are presumed lawful until they are declared void by the EU Courts. Therefore, while the court proceedings you are referring to in your comments are pending, the relevant findings of the Board of Appeal in case A-010-2018 and A-011-2018 remain fully applicable.

7 A registrant may only adapt this information requirement based on the general rules set out in Annex XI. ECHA remarks that minimisation of vertebrate animal testing is not on its own a legal ground for adaptation under the general rules of Annex XI.

8 Your registration dossier does not include any information on long-term toxicity on fish.

9 ECHA requested your considerations for alternative methods to fulfil the information requirement for long-term toxicity on fish. You provided your considerations concluding that there were no alternative methods which could be used to adapt the information requirement(s) for which testing is proposed. ECHA has taken these considerations into account.

10 ECHA agrees that an appropriate study on long-term toxicity on fish is needed.

*1.2. Test selection and study specifications*

- 11 The proposed Fish, Early-Life Stage Toxicity Test (test method: OECD TG 210) is appropriate to cover the information requirement for long-term toxicity on fish (Guidance on IRs and CSA, Section R.7.8.4.1.).

*1.3. Outcome*

- 12 Your testing proposal is accepted under Article 40(3)(a) and you are requested to conduct the test, as specified above.

**Appendix 2: Procedure**

ECHA started the testing proposal evaluation in accordance with Article 40(1) on 9 August 2022.

ECHA held a third-party consultation for the testing proposal(s) from 22 September 2022 until 7 November 2022. ECHA did not receive information from third parties.

ECHA followed the procedure detailed in Articles 50 and 51 of REACH.

The deadline of the decision is set based on standard practice for carrying out OECD TG tests. It has been exceptionally extended by 12 months from the standard deadline granted by ECHA to take into account currently longer lead times in contract research organisations.

ECHA notified you of the draft decision and invited you to provide comments.

ECHA did not receive any comments within the commenting period.

ECHA notified the draft decision to the competent authorities of the Member States for proposals for amendment.

As no amendments were proposed, ECHA adopted the decision under Article 51(3) of REACH.

**Appendix 3: Addressee(s) of this decision and their corresponding information requirements**

In accordance with Articles 10(a) and 12(1) of REACH, the information requirements for individual registrations are defined as follows:

- the information specified in Annexes VII, VIII and IX to REACH, for registration at 100-1000 tpa;

| <b>Registrant Name</b> | <b>Registration number</b> | <b>Highest REACH Annex applicable to you</b> |
|------------------------|----------------------------|--|
| ████████████████████   | ████████████████████       | ██████                                       |

Where applicable, the name of a third-party representative (TPR) may be displayed in the list of recipients whereas ECHA will send the decision to the actual registrant.

## Appendix 4: Conducting and reporting new tests for REACH purposes

### 1. Requirements when conducting and reporting new tests for REACH purposes

#### 1.1. Test methods, GLP requirements and reporting

- (1) Under Article 13(3) of REACH, all new data generated as a result of this decision must be conducted according to the test methods laid down in a European Commission Regulation or to international test methods recognised by the Commission or ECHA as being appropriate.
- (2) Under Article 13(4) of REACH, ecotoxicological and toxicological tests and analyses must be carried out according to the GLP principles (Directive 2004/10/EC) or other international standards recognised by the Commission or ECHA.
- (3) Under Article 10(a)(vi) and (vii) of REACH, all new data generated as a result of this decision must be reported as study summaries, or as robust study summaries, if required under Annex I of REACH. See ECHA Practical Guide on How to report robust study summaries<sup>2</sup>.
- (4) Under the introductory part of Annexes VII/VIII/IX/X to REACH, where a test method offers flexibility in the study design, for example in relation to the choice of dose levels or concentrations, the chosen study design must ensure that the data generated are adequate for hazard identification and risk assessment.

#### 1.2. Test material

Before generating new data, you must agree within the joint submission on the chemical composition of the material to be tested (Test Material) which must be relevant for all the registrants of the Substance.

- (1) Selection of the Test material(s)  
The Test Material used to generate the new data must be selected taking into account the following:
  - the variation in compositions reported by all members of the joint submission,
  - the boundary composition(s) of the Substance,
  - the impact of each constituent/ impurity on the test results for the endpoint to be assessed. For example, if a constituent/ impurity of the Substance is known to have an impact on (eco)toxicity, the selected Test Material must contain that constituent/ impurity.
- (2) Information on the Test Material needed in the updated dossier
  - You must report the composition of the Test Material selected for each study, under the "Test material information" section, for each respective endpoint study record in IUCLID.
  - The reported composition must include all constituents of each Test Material and their concentration values and other parameters relevant for the property to be tested.

---

<sup>2</sup> <https://echa.europa.eu/practical-guides>

This information is needed to assess whether the Test Material is relevant for the Substance and whether it is suitable for use by all members of the joint submission.

Technical instructions on how to report the above is available in the manual on How to prepare registration and PPORD dossiers<sup>3</sup>.
