

Summary of product characteristics for a biocidal product

Product name: Nova Dip Barriere

Product type(s): PT03 - Veterinary hygiene (Disinfectants)

PT03 - Veterinary hygiene (Disinfectants)

Authorisation number: EU-0019757-0000

R4BP 3 asset reference number: EU-0019757-0003

1.3. Manufacturer(s) of the biocidal products

| | |
|--|-----------------------------------|
| Name of the manufacturer | Novadan ApS |
| Address of the manufacturer | Platinvej 21 6000 Kolding Denmark |
| Location of manufacturing sites | Platinvej 21 6000 Kolding Denmark |

1.4. Manufacturer(s) of the active substance(s)

| | |
|--|---|
| Active substance | 1349 - Polyvinylpyrrolidone iodine |
| Name of the manufacturer | Marcus Research Laboratory, Inc. |
| Address of the manufacturer | Delmar Blvd. 63103-1789 Saint Louis, Missouri United States |
| Location of manufacturing sites | Delmar Blvd. 63103-1789 Saint Louis, Missouri United States |

| | |
|--|--|
| Active substance | 1319 - Iodine |
| Name of the manufacturer | Cosayach Nitratos S.A. |
| Address of the manufacturer | Hnos Amunátegui 178 8320000 Santiago Chile |
| Location of manufacturing sites | S.C.M. Cosayach Cala Cala 1180000 Pozo Almonte Chile |

| | |
|--|---|
| Active substance | 1319 - Iodine |
| Name of the manufacturer | ACF Minera S.A. |
| Address of the manufacturer | San Martin No 499 1100000 Iquique Chile |
| Location of manufacturing sites | Lagunas mine 1180000 Pozo Almonte Chile |

| | |
|--|---|
| Active substance | 1319 - Iodine |
| Name of the manufacturer | Sociedad Quimica y Minera (SQM) S.A. |
| Address of the manufacturer | Los Militares 4290, Piso 4, Las Condes 8320000 Santiago Chile |
| Location of manufacturing sites | Nueva Victoria plant 5090000 Pedro de Valdivia plant Chile |

2. Product composition and formulation

2.1. Qualitative and quantitative information on the composition of the biocidal product

| Common name | IUPAC name | Function | CAS number | EC number | Content (%) |
|--------------------------------|------------|------------------|------------|-----------|-------------|
| Polyvinylpyrrolidone iodine | | Active Substance | 25655-41-8 | | 0,82 |
| Iodine | | Active Substance | 7553-56-2 | 231-442-4 | 0,172 |

2.2. Type of formulation

AL - Any other liquid

3. Hazard and precautionary statements

Hazard statements

Safety data sheet available on request.

Precautionary statements

Keep out of reach of children.

4. Authorised use(s)

4.1 Use description

Use 1 - Use #1.1: post-milking manual dipping (RTU)

Product type

PT03 - Veterinary hygiene (Disinfectants)

Where relevant, an exact description of the authorised use

not relevant

Target organism(s) (including development stage)

Scientific name: Bacteria
Common name: Bacteria
Development stage:

Scientific name: Yeast
Common name: Yeasts
Development stage:

Field(s) of use

4.1.1 Use-specific instructions for use

See general directions for use

4.1.2 Use-specific risk mitigation measures

See general directions for use.

4.1.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

See general directions for use.

4.1.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

See general directions for use.

4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

See general directions for use.

4.2 Use description

Use 2 - Use #1.4: post-milking automated dipping (RTU)

Product type

PT03 - Veterinary hygiene (Disinfectants)

Where relevant, an exact description of the authorised use

not relevant

Target organism(s) (including development stage)

Scientific name: Bacteria
Common name: Bacteria
Development stage:

Scientific name: Yeast
Common name: Yeasts
Development stage:

Field(s) of use

Indoor

DISINFECTATION FOR VETERINARY HYGIENE: Teat disinfection product for milkable animals (cows, buffaloes, sheep, goats) for use after milking.

Application method(s)

automated dipping (RTU) -

Open a can containing the RTU product and insert the suction tube of the automated dipping-system.
Before milking clean teats carefully by automatic procedure or manually.

After milking, the vacuum is shut off and the teat dip is injected into a manifold on the claw piece. The teats are coated with 2-4 ml of dip when the teat cup is withdrawn by the Automatic Cluster Removal (ACR). After the removal of the ACR, every liner of the automated dipping-system is thoroughly rinsed with water and blown out with compressed air. In a final cleaning step after each milking session of the herd, the liners are disinfected (e.g. with a chlorine-based product) and blown out again with compressed air. Afterwards, the milking system is ready for the next milking event. The whole process is automated.

Application rate(s) and frequencies

cows and buffaloes: 4 ml/animal per treatment; sheep: 2 ml/animal per treatment ; goats: 3 ml/animal per treatment - -
Post-milking application 1-3 times per day (apply after every milking)

Category(ies) of users

Professional

Pack sizes and packaging material

Jerry can, HDPE: 0.5 L, 5 L, 10 L, 20 L, 60 L
Plastic drum, HDPE: 200 L
IBC, HDPE: 1000 L

Opaque containers.

4.2.1 Use-specific instructions for use

See general directions for use

4.2.2 Use-specific risk mitigation measures

See general directions for use.

4.2.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

See general directions for use.

4.2.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

See general directions for use.

4.2.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

See general directions for use.

5. General directions for use

5.1. Instructions for use

Fill the reservoir with the RTU product and screw the dip cup on top.
The products must be brought to temperatures above 20°C before use.
The use of a dosing pump for filling the product into the application equipment is recommended

To ensure sufficient contact time, care should be taken that the product is not removed after application. Leave the product on the teats and keep the animals standing for at least five minutes after treatment for post-milking disinfection.

5.2. Risk mitigation measures

In case a combination of pre- and post-milking disinfection is necessary, using another product not containing iodine has to be considered for pre-milking disinfection.

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Description of first aid measures

General: Remove affected person from source of contamination.
After inhalation: Remove person to fresh air and keep comfortable for breathing. Get medical attention if any discomfort continues.
After skin contact: Rinse with water. Remove contaminated clothing and shoes. Seek medical advice if any skin reaction/or discomfort occurs.
After eye contact: Immediately rinse with water (at least 15 minutes). Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if any discomfort continues.
After ingestion: Contact poison treatment specialist immediately if symptoms occur and/or in case of mouth contact with large quantities. Do not give fluids or induce vomiting in case of impaired consciousness; place in recovery position and seek medical advice immediately.

If medical advice is needed, have product container or label at hand.

Environmental emergency measures

Prevent run-off from entering drains, sewers or waterways
Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air)
Dike to collect larger liquid spills
Contain and/or absorb spill with inert material, then place in closed and suitable container for disposal according to regulations
Do not place spilled materials back into the original container

5.4. Instructions for safe disposal of the product and its packaging

Method of disposal: Dispose unused product and the packaging in accordance with local requirements. Used product can be flushed to the municipal sewer or disposed to the manure deposit depending on local requirements. Avoid release to an individual waste water treatment plant.
Empty containers are rinsed with plenty of water and disposed to normal or commercial waste.
The paper towels used for the cleaning of teats are disposed in the normal rubbish.
Product classified as hazardous waste: No
Packaging classified as hazardous waste: No
EWC waste code: EWC: 0706 wastes from the MFSU of fats, grease, soaps, detergents, disinfectants and cosmetics
Other information: When handling waste, consideration should be made to the safety precautions applying to handling of the product.
Waste code applies to product remnants in pure form.

5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Mentioned in the SDS: Keep in original container. Store the product away from direct sunlight in opaque containers. Keep separate from food, feedstuffs, fertilisers and other sensitive material. Store above freezing.
Storage temperature: 0 – 30°C
Shelf-life: 18 months.

6. Other information

pH range of meta-SPC 3: 4-5
