Administrative information

1.1. Trade names of the product

COMPO Mierenlokdoos
Insectex Mierenlokdoos
Kruidvat Mierenlokdoos
Trekpleister Mierenlokdoos

1.2. Authorisation holder

Name and address of the authorisation holder	Name	terrasan Haus- + Gartenbedarf GmbH
	Address	Rosenweg 2 - 4 86641 Rain am Lech Germany
Authorisation number		
R4BP 3 asset reference number		NL-0013401-0000
Date of the authorisation		07/07/2017
Expiry date of the authorisation		07/07/2027

1.3. Manufacturer(s) of the biocidal products

Name of the manufacturer	terrasan Haus- + Gartenbedarf GmbH
Address of the manufacturer	Rosenweg 2 - 4 86641 Rain am Lech Germany
Location of manufacturing sites	Rosenweg 2 - 4 86641 Rain am Lech Germany

1.4. Manufacturer(s) of the active substance(s)

Active substance	59 - 1R-trans phenothrin
Name of the manufacturer	Sumitomo Chemical (UK) PLC
Address of the manufacturer	77-85 Fulham Palace Road W6 8JA London United Kingdom
Location of manufacturing sites	77-85 Fulham Palace Road W6 8JA London United Kingdom

2. Product composition and formulation

2.1. Qualitative and quantitative information on the composition of the biocidal product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
1R-trans phenothrin	3-phenoxybenzyl (1R,3R)-2,2-dimethyl-3-(2-methylprop-1-enyl)cyclopropanecarbox	Active Substance	26046-85-5	247-431-2	0,1

2.2. Type of formulation

RB - Bait (ready for use)

3. Hazard and precautionary statements

Hazard statements

May cause an allergic skin reaction.
Toxic to aquatic life with long lasting effects.

Precautionary statements

Keep out of reach of children.
Read carefully and follow all instructions.
Wash hands thoroughly after handling.
Do not eat, drink or smoke when using this product.
Avoid release to the environment.

IF ON SKIN:Wash with plenty of water.

If skin irritation or rash occurs:Get medical advice.

Dispose of contents to an approved waste disposal plant.

4. Authorised use(s)

4.1 Use description

Use 1 - Bait application

Product type

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Where relevant, an exact description of the authorised use

Insecticide

Target organism(s) (including development stage)

Scientific name: *Lasius niger*
Common name: Black garden ant
Development stage: Adults and nymphs

Scientific name: *Lasius emarginatus*
Common name: Black ant
Development stage: Adults and nymphs

Scientific name: *Tetramorium caespitum*
Common name: Pavement ant
Development stage: Adults and nymphs

Scientific name: *Tapinoma erraticum*
Common name: Tapinoma ant
Development stage: Adults and nymphs

Scientific name: *Linepithema humile*
Common name: Argentine Ant
Development stage: Adults and nymphs

Scientific name: *Monomorium pharaonis*
Common name: Pharaoh ant
Development stage: Adults and nymphs

Field(s) of use

Indoor

Outdoor

Areas of use are in-house and terraces.

Application method(s)

Method: Bait application
Detailed description:

The product is a ready-to-use insecticide formulated as a paste and distributed in a bait station containing 0.1 % (w/w) (1 g/L) 1R-trans phenothrin as active substance (1 bait box contains 2 gr of biocidal product, i.e. 0.002g 1R-trans phenothrin).

The product is an insecticide intended for in-house treatment and on terraces. The product is applied as a bait box and should be placed in the close vicinity of ant nests or trails. The bait box needs to be protected from moisture and rainfall.

Application rate(s) and frequencies

Application Rate: 1 bait box (2 g biocidal product)/ nest, with a maximum of 1 bait box per 7.5 m²
Dilution (%): No dilution
Number and timing of application:
One bait box per nest. Complete nest kill can be expected in 2 to 4 weeks.

Category(ies) of users

General public (non-professional)

Pack sizes and packaging material

White screw-top bait station made of HDPE containing 2 g of the biocidal product.
Black thermoformed bait box made of polystyrene high impact containing 2 g of the biocidal product.
Green screw-top bait station made of polypropylene, homopolymer containing 2 g of the biocidal product.

4.1.1 Use-specific instructions for use

Please refer to general directions for use.

4.1.2 Use-specific risk mitigation measures

Please refer to general directions for use.

4.1.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Please refer to general directions for use.

4.1.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Please refer to general directions for use.

4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Please refer to general directions for use.

5. General directions for use

5.1. Instructions for use

The product is a bait paste provided in a bait box that kills ants in the house and on terraces. The product contains attractive bait combined with the active ingredient, which is collected by the ants and transported into their nests. The uptake of the bait is improved by removing other food sources in the vicinity of the bait box.

- The product is packed in two different bait box designs, a thermoformed station and a screw-top station. In order to open the thermoformed bait box, the bait box must be broken from its attachment. Thereby entrances to the bait box will be opened. In order to open the screw-top bait box the top part of the station must be screwed to the left as far as it will go.

- Place the bait station in an area that is protected from moisture and rainfall and near the nest or ant trail.
- Apply the product away from direct sunlight or heat sources (e.g. do not place it under a radiator).
- Apply bait box on hard surfaces only.
- No or only a few dead ants will be visible because the product does not start to act until it has entered the ant nest.

Place the station in the area of infestation for at least eight to fourteen days. Remove the product when ants are no longer visible. Replace the bait box if it is empty and ants are still visible. To close the screw-top station, the top part of the station must be screwed to the right as far as it will go.

5.2. Risk mitigation measures

- The product must be protected from moisture and rainfall.
 - The product and its residues, empty containers or packaging must not enter drains, nor surface water.
 - Avoid any unnecessary contact with the product. Misuse may cause harm to health. Keep away from children and pets.
 - Avoid any direct or indirect contact with food, feed and drinks.
 - Do not use force when opening the bait stations.
 - Dispose of product residues in the original packaging or empty bait stations at a collection point for household chemicals.
- Dispose of folding carton at a collection point for recyclable materials.

- Do not re-use original packaging or empty containers.

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Particulars of likely direct or indirect effects: None known when the product is used properly according to the product label.

First aid instructions:

In case of skin contact: After contact with skin, wash immediately with plenty of water.

In case of eye contact: Check for and remove any contact lenses if easy to do. Continue to rinse with warm water for at least 10 minutes. Get medical attention if irritation or vision impairment occurs.

If swallowed: If swallowed, seek medical advice immediately and show this container or label.

Indication of any immediate medical attention and special treatment needed.

Treatment: Treat symptomatically.

Emergency measures to protect the environment: Environmental precautions: Do not let product enter drains, surface water or subsoil water.

5.4. Instructions for safe disposal of the product and its packaging

Product: Disposal together with normal waste is not allowed. Special disposal required according to local regulations.
Contaminated packaging: Observe national and local legal requirements.

5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Requirements for storage areas and containers: Store protected against frost.
Further information on storage conditions: Keep container tightly closed in a cool place.
Advice on common storage: Keep away from food, drink and animal feed.
The shelf life of the biocidal product is four years at 20 °C.
Storage temperature: 0 - 30 °C

6. Other information

Based on its contribution to the labelling with H317 the label must include the following text:
Contains 2-methylisothiazol-3(2H)-one.
