

Justification for removing a substance from CoRAP prior to evaluation

Substance Name (public name): 2,6,10-Trimethyldodecane (Farnesane)

EC Number: 622-542-2

CAS Number: 3891-98-3

Authority: Austria

Date: 22/03/2022

The priority for evaluating the substance has been reconsidered based on:

<input type="checkbox"/>	The initial hazard ground of concern has been verified and considered of low priority

<input type="checkbox"/>	The initial exposure/risk ground of concern has been verified and considered of low priority

<input checked="" type="checkbox"/>	The generation of information under Substance Evaluation is considered of low priority because
	<input checked="" type="checkbox"/> Already ongoing or implemented regulatory process(es) <i>A compliance check has been performed leading to several data requests. The substance is removed from CoRAP, as it is possible that the initial grounds of concern will be verified via these data requested and generated. There is a significant likeliness that substance evaluation might be not required to request further data and to be able to conclude on the concerns, as soon as these new data are available. Nevertheless, it cannot be excluded fully that the substance will be put on the CoRAP list again and reconsidered for substance evaluation, if relevant concerns remain (despite of the new data generated) or new concerns are identified in future.</i>
