

**DECISION OF THE BOARD OF APPEAL
OF THE EUROPEAN CHEMICALS AGENCY**

6 March 2024

Application to intervene

(Interest in the result of the case – Accredited Stakeholder Organisations)

Case number	A-012-2023
Language of the case	English
Appellant	DSM Nutritional Products GmbH, Germany Represented by Ruxandra Cana, Zanda Romata and Roman Spangenberg Steptoe LLP, Belgium
Contested Decision	Decision of 10 August 2023 on the substance evaluation of 1-[4-(1,1-dimethylethyl)phenyl]-3-(4-methoxyphenyl)propane-1,3-dione ¹ ('the Substance'), adopted by the European Chemicals Agency pursuant to Article 46 of the REACH Regulation ² The Contested Decision was notified to the Appellant under annotation number SEV-D-2114649046-48-01/F
Applicant	PETA Science Consortium International e.V. ('PSCI'), Germany

THE BOARD OF APPEAL

composed of Antoine Buchet (Chairman and Rapporteur), Nikolaos Georgiadis (Technically Qualified Member), and Marijke Schurmans (Legally Qualified Member)

Registrar: Alen Močilnikar

gives the following

¹ EC number 274-581-6; CAS number 70356-09-1.

² Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (OJ L 396, 30.12.2006, p. 1). All references to Articles concern the REACH Regulation unless stated otherwise.

Decision

Summary of the facts

1. Due to initial grounds of concern relating to suspected persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB) properties, consumer use, exposure of the environment, high (aggregated) tonnage and wide dispersive use, the Substance was included in the Community rolling action plan (CoRAP) to be evaluated in 2015.
2. On 23 March 2017, the Agency adopted a substance evaluation decision on the Substance (first substance evaluation decision) requesting information on aerobic mineralisation in surface water, aerobic and anaerobic transformation in aquatic sediment systems, long-term toxicity testing on aquatic invertebrates and long-term toxicity testing on fish.
3. In 2021, the Appellant submitted information in response to the first substance evaluation decision. Based on the available information, the evaluating Member State competent authority (eMSCA) considered that the Substance is potentially PBT.
4. During the follow-up of the first substance evaluation decision, and based on new information available in academic literature, the eMSCA identified an additional concern related to endocrine disrupting properties in the environment.
5. On 10 August 2023, the Agency adopted the Contested Decision requesting the Appellant and other registrants of the Substance to submit information on an amphibian metamorphosis assay pursuant to OECD TG 231 using the Substance in order to clarify the concern relating to endocrine disruption in the environment.
6. On 9 November 2023, the Appellant filed its appeal seeking the annulment of the Contested Decision.
7. In its appeal, the Appellant argues that the Agency breached Article 46(3) by exceeding the time limit to complete its assessment of the information submitted in response to the first substance evaluation decision. The Appellant argues that the Agency also breached Article 46(3) by basing its decision on information other than that submitted in response to the first substance evaluation decision. According to the Appellant, substance evaluation decisions adopted on the basis of information other than that submitted in response to a substance evaluation decision must be adopted under Article 47(1). The Appellant also argues that the Agency made an error of assessment in relying on unreliable studies to justify the concern relating to endocrine disruption.
8. On 9 January 2024, an announcement was published on the Agency's website in accordance with Article 6(6) of the Rules of Procedure³.
9. On 29 January 2024, PSCI applied for leave to intervene in the proceedings in support of the remedy sought by the Appellant. PSCI argues that its objectives include the reduction, and ultimately the elimination, of the use of animals in regulatory testing and other scientific procedures. PSCI argues that it is an Accredited Stakeholder Organisation with the Agency.
10. PSCI argues that the case raises questions of principle related to:
 - (a) the circumstances under which the Agency may request additional tests on animals;
 - (b) how the Agency fulfils the requirements of proportionality and animal welfare, as well as the requirement under Article 25(1) that information must be generated wherever possible by means other than tests on vertebrate animals; and
 - (c) how the Agency takes into account animal welfare considerations when assessing available tests to meet information requirements.

³ Commission Regulation (EC) No 771/2008 laying down the rules of organisation and procedure of the Board of Appeal of the European Chemicals Agency (OJ L 206, 2.8.2008, p. 5).

11. On 12 and 13 February 2024 respectively, the Appellant and the Agency submitted their observations on the application to intervene. The Appellant and the Agency did not object to PSCI's application.

Reasons

12. Under the first subparagraph of Article 8(1) of the Rules of Procedure, any person establishing an interest in the result of a case may intervene in the proceedings before the Board of Appeal.
13. PSCI is included in the list of Accredited Stakeholder Organisations published on the Agency's website. An Accredited Stakeholder Organisation, such as PSCI, has an interest in the result of a case if that case raises questions of principle capable of affecting its interests⁴.
14. PSCI's interests include the reduction, and ultimately the elimination, of the use of animals in testing under the REACH Regulation. The present case raises questions of principle which relate directly to Agency decisions requiring testing on vertebrate animals. In particular, those questions of principle relate to how the Agency reaches its decisions requiring testing on vertebrate animals under substance evaluation. These questions of principle are therefore capable of affecting PSCI's interests.
15. Therefore, PSCI has an interest in the result of the present case within the meaning of the first subparagraph of Article 8(1) of the Rules of Procedure.
16. As the application for leave to intervene also complies with Article 8(2), (3) and (4) of the Rules of Procedure, it must be granted.

On those grounds,

THE BOARD OF APPEAL

hereby:

- 1. Admits the application to intervene by PSCI in Case A-012-2023 in support of the Appellant.**
- 2. Instructs the Registrar to arrange for copies of the non-confidential versions of the Notice of Appeal and the Defence to be served on the Intervener.**
- 3. The Chairman of the Board of Appeal will prescribe a period within which PSCI may submit a statement in intervention.**

Antoine BUCHET
Chairman of the Board of Appeal

Alen MOČILNIKAR
Registrar of the Board of Appeal
