

Summary of product characteristics for a biocidal product

Product name: Biopren pharaoh's ant colony eliminator

Product type(s): PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Authorisation number: 592-1

R4BP 3 asset reference number: DK-0013189-0000

1.2. Authorisation holder

Name and address of the authorisation holder

Name	Bábolna Bioenvironmental Centre Private Limited Company
Address	Szállás u. 6. H-1107 Budapest Hungary

Authorisation number

592-1

R4BP 3 asset reference number

DK-0013189-0000

Date of the authorisation

07/09/2017

Expiry date of the authorisation

01/05/2027

1.3. Manufacturer(s) of the biocidal products

Name of the manufacturer

Bábolna Bioenvironmental Centre Private Limited Company

Address of the manufacturer

Szállás utca 6. 1107 Budapest Hungary

Location of manufacturing sites

Köves J. u. 3. 2943 Bábolna Hungary

1.4. Manufacturer(s) of the active substance(s)

Active substance

1386 - S-Methoprene

Name of the manufacturer

Bábolna Bioenvironmental Centre Private Limited Company

Address of the manufacturer

Szállás utca 6. 1107 Budapest Hungary

Location of manufacturing sites

Szállás utca 6. 1107 Budapest Hungary

2. Product composition and formulation

2.1. Qualitative and quantitative information on the composition of the biocidal product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
S-Methoprene	Isopropyl-(2E,4E,7S)-11-methoxy-3,7,11-trimethyl-2,4-dodecadienoate	Active Substance	65733-16-6		0,5

2.2. Type of formulation

GR - Granule

3. Hazard and precautionary statements

Hazard statements

Harmful to aquatic life with long lasting effects.

Precautionary statements

Avoid release to the environment.

Dispose of contents to in accordance with applicable regulations.

4. Authorised use(s)

4.1 Use description

Use 1 - authorised use

Product type

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Where relevant, an exact description of the authorised use

The bait stations are placed along the foraging routes of ant workers

Target organism(s) (including development stage)

Scientific name: Myrmicinae:
Common name: Pharaoh ant
Development stage: larvae and queens

Field(s) of use

Indoor

For indoor use only.

Application method(s)

Method: Bait application
Detailed description:

Application rate(s) and frequencies	<p>Bait application in pre-filled bait stations</p> <p>Application Rate: 2 bait stations / 20 m2 (0.25 g/m2) Dilution (%): 0 Number and timing of application: To ensure reliable effect it is recommended to leave the baits at place for a period of 3 months even if the insects disappear from the premises earlier. Residual efficacy: 10-14 weeks.</p>
Category(ies) of users	<p>Trained professional</p> <p>Professional</p> <p>General public (non-professional)</p>
Pack sizes and packaging material	<p><u>For general public:</u> 3 x 2.5 grams in plastic (PVC + PE) bait stations total 7.5 grams</p> <p>2.5 grams of bait in transparent plastic blisters with adhesive sticker on each blister, 3 blisters / package. total 7.5 grams</p> <p><u>For professionals and trained professionals:</u> 2.5 grams of bait in transparent plastic blisters with adhesive sticker on each blister, 12 blisters / package. total 30 grams</p> <p>2.5 grams of bait in transparent plastic blisters with adhesive sticker on each blister, 24 blisters / package. total 60 grams</p>

4.1.1 Use-specific instructions for use

Cut at the dotted line at the end of the plastic pack and remove the protective foil from the sticky pad. Fasten the bait along the foraging routes of ant workers (very close to the route, but not directly on it) with its opening on top or at side. Avoid spillage of the granules. The bait should be placed in the premises where ants appear, mainly in the kitchen and bathroom. Use the product in other premises as well, if necessary.

Recommended dose: 2 bait stations / 20 m2.

Following bait placement, for a short period of time more ants may be observed than before, but this is the result of the attractiveness of the bait substance. To ensure reliable effect it is recommended to leave the baits at place for a period of 3 months even if the insects disappear from the premise earlier. If a bait station becomes empty (or nearly empty) or damaged (e.g. drenched), it must be replaced with a new one. Protect the placed baits from water (e.g. during cleaning) as the product may lose its efficacy because of water. Attention! While you use ant baits, do not apply any other insecticides! Residual efficacy: 10-14 weeks. Not for use against any other pest than indicated on the label and not for use in higher doses than indicated.

4.1.2 Use-specific risk mitigation measures

Keep out of the reach of children, do not allow use by children.

The bait should be placed inaccessible to children or domestic animals.
Do not eat, drink or smoke during work.
After handling, wash hands with plenty of water and soap.

Avoid release to the environment. Prevent the product residues or its container from entering drains or watercourses.
Keep away from food, drink and animal feedingstuffs.

4.1.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

If inhaled: Keep patient calm, remove to fresh air. Seek medical advice.
After contact with skin: Wash thoroughly with soap and water.
After eye contact: Rinse with plenty of water for several minutes. If irritation persists, seek medical attention.
If swallowed: get medical attention if feeling unwell.
Contain the spill, sweep spillage and transfer into waste containers for disposal.

4.1.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

The bait stations should not be washed or reused.
Dispose of waste products and bait stations after treatment in accordance with local requirements. If it is not contrary to official specifications, packaging may be treated like household waste. Prevent contamination of environment by wastes.

4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Shelf-life and storage: 2 years if stored in original unopened package in a dark, dry, cool and frost-free place. Keep away from feed and foodstuffs, medicines. (Date of manufacture must be shown on the label.)

5. General directions for use

5.1. Instructions for use

Cut at the dotted line at the end of the plastic pack and remove the protective foil from the sticky pad. Fasten the bait along the foraging routes of ant workers (very close to the route, but not directly on it) with its opening on top or at side. Avoid spillage of the granules. The bait should be placed in the premises where ants appear, mainly in the kitchen and bathroom. Use the product in other premises as well, if necessary.
Recommended dose: 2 bait stations / 20 m².
Following bait placement, for a short period of time more ants may be observed than before, but this is the result of the attractiveness of the bait substance. To ensure reliable effect it is recommended to leave the baits at place for a period of 3 months even if the insects disappear from the premise earlier. If a bait station becomes empty (or nearly empty) or damaged (e.g. drenched), it must be replaced with a new one. Protect the placed baits from water (e.g. during cleaning) as the product may lose its efficacy because of water. Attention! While you use ant baits, do not apply any other insecticides! Residual efficacy: 10-14 weeks.
Not for use against any other pest than indicated on the label and not for use in higher doses than indicated.

5.2. Risk mitigation measures

Keep out of the reach of children, do not allow use by children.
The bait should be placed inaccessible to children or domestic animals.
Do not eat, drink or smoke during work.
After handling, wash hands with plenty of water and soap.

Avoid release to the environment. Prevent the product residues or its container from entering drains or watercourses.
Keep away from food, drink and animal feedingstuffs.

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

If inhaled: Keep patient calm, remove to fresh air. Seek medical advice.
After contact with skin: Wash thoroughly with soap and water.
After eye contact: Rinse with plenty of water for several minutes. If irritation persists, seek medical attention.
If swallowed: get medical attention if feeling unwell.
Contain the spill, sweep spillage and transfer into waste containers for disposal.

5.4. Instructions for safe disposal of the product and its packaging

The bait stations should not be washed or reused.
Dispose of waste products and bait stations after treatment in accordance with local requirements. If it is not contrary to official specifications, packaging may be treated like household waste. Prevent contamination of environment by wastes.

5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Shelf-life and storage: 3 years if stored in original unopened package in a dark, dry, cool and frost-free place. Keep away from feed and foodstuffs, medicines. (Date of manufacture must be shown on the label.)

6. Other information

The product contains a bittering agent – denatonium benzoate –which helps prevent incidental human consumption.
Authorisation number: HU-2017-PA-18-00189-0000

Conditions:

Results of the ongoing long term storage stability study at ambient temperature (Study No.: 484-170-0416) should be submitted by 31st December 2018, at the latest to the Hungarian Biocides Competent Authority.

III. Etiketten skal indeholde nedenstående oplysninger. Op-lys-ninger i citationstegn skal angives ordret:

1) I hovedfeltet:
"Insektmiddel

Må kun anvendes som insektmiddel mod faraomyrer (*Monomorium pharaonis*). Midlet må kun anvendes indendørs."

2) I advarselsfeltet:
"FORSIGTIG

Skadelig for vandlevende organismer, med langvarige virkninger (H412).

Undgå udledning til miljøet.

Vask huden grundigt efter brug.

Overtrædelse af nedenstående særligt fremhævede forskrifter kan medføre straf:

Må kun anvendes som insektmiddel mod faraomyrer (*Monomorium pharaonis*) . Midlet må kun anvendes indendørs.

Må ikke anvendes mod andre skadevoldere og ikke i højere doseringer end de i brugsanvisningen nævnte.

Opbevares utilgængeligt for børn.

Levnedsmidler og foderstoffer må ikke forurenes.

Må ikke opbevares sammen med fødevarer, drikkevarer og foderstoffer.”

Evt. oplysninger om førstehjælp.

3) I deklarationsfeltet:

- a) Teksten "Insektmiddel BPR-reg. nr. 592-1. Aktivstof og biocidholdigt produkt er godkendt efter biocidforordningen (Forordning (EU) nr. 528/2012)".
- b) Oplysning om præparattype: "lokkedåse" for dette præparat.
- c) Indholdet af aktivstof i vægtprocent (% w/w) og g/kg.
- d) Udløbsdatoen skal anføres. Denne dato må højst være 3 år efter produktionsdatoen. Etikettens dato kan udformes som en hen-visning til en produktionsdato andetsteds på emballagen.
- e) Batchnummer eller – betegnelse skal anføres.
- f) Pakningsstørrelse i g.
- g) Godkendelsesindehavers navn og adresse.

4) Brugsanvisningen:

Oplysninger om skadevoldere, anvendelsesområde og doseringer.

Følgende retningslinjer gælder i forhold til bortskaffelse.

Der skal mærkes med sikkerhedssætning P501: "Indholdet/holderen bortskaffes i overensstemmelse med kommunale regler for affaldshåndtering."

Derudover skal mærkningen ske efter retningslinjerne:

"Tom emballage og rester kan bortskaffes med dagrenovation".
